

AL 450

Filler Activator

Composition : combination of activating substances and amine derivatives bound to highly active filler

Appearance: White Powder

Staining: None

Discoloring: None

Storage: Be stored in cool and dry place without any limitation.

Package: 25 kgs in cardboard carton.

Function:

1. AL 450 has a good dispersing effect on the ingredient of the compound and activates especially the light colour reinforcing fillers.
2. The vulcanization is accelerated to such an extent that AL450 may be used as a secondary accelerator. It can help to extend scorch time and shorter fully curing time.
3. When use as a dispersing agent and promoter for fillers. AL450 will be easily incorporated together with fillers.
4. It's suitable for NR、SBR、BR、IR、CR、NBR、IIR....etc..

Dosage: As secondary accelerator a dosage from 1-2phr

As promoter for reinforcing fillers 3-6% calculated on the fillers.
